SOFTWARE ENGINEER

KEY SKILLS

- Java - Spring Boot, Hibernate, Thymeleaf
- C# - .NET Framework / .NET Core, REST API
- Python - TensorFlow, Keras, NumPy
- Web - HTML, CSS, React, JavaScript, Node.js
- Game Dev - Unity
- SQL - MSSQL, MySQL
- NoSQL - MongoDB, Firebase
- Soft Skills - Time Management, Problem-Solving, Flexibility, Collaboration

LANGUAGES

English - Fluent Polish - Advanced Ukrainian - Native Speaker Russian - Native Speaker

PROFESSIONAL EXPERIENCE

Lionbridge | QA Tester Poland, Warsaw | Jun 2023 - Present

- Tested video games across platforms for functionality, usability, and performance (PC, console, mobile).
- Logged and documented issues in Jira, ensuring clear reproduction steps and fast resolution.
- Collaborated with devs to verify fixes and maintain quality standards.
- Gained experience in bug tracking, version control, test plans, and real-world QA workflows.

COMFY | IT Consultant Ukraine, Dnipro | Jun 2022 - Sep 2022

- Addressed customer website inquiries, complaints, and suggestions.
- Collaborated with developers to resolve technical issues and conducted reviews.
- Supported website maintenance and contributed to integrating new technologies.

TECHNICAL PROJECTS

Master Diploma at Polish-Japanese Academy of IT | [GitHub](#) March 2024 - May 2025

- Built a mobile fitness app in Unity with gamification: XP, quests, levels, progression tree, and leaderboards
- Used Firebase for login, cloud storage, and real-time sync
- Integrated Google Analytics for user behavior tracking
- Applied game design principles to drive motivation and habit-building through visual progress and rewards
- Focused on clean UI/UX for mobile devices using Unity best practices

App Data Prediction Project at Polish-Japanese Academy of IT | [GitHub](#) Jan 2025

- Created a scalable data pipeline to predict app installs, reviews, and ratings using a Google Play Store dataset.
- Designed a distributed architecture with a Next.js and React frontend for user interaction.
- Utilized Python for data science and machine learning, with RabbitMQ for inter-component communication and MySQL/PostgreSQL for database management.

Bachelor Diploma at Polish-Japanese Academy of IT | [Trailer](#) Jan 2023 - Feb 2024

- Built a 3D FPS game in Unity with aim training, combat AI, and skill challenges
- Implemented secure Firebase Auth, in-game shop, and a real-time leaderboard system
- Designed mechanics for player engagement and progression through dynamic AI behaviors
- Top grade among 15+ teams; project showcased in university's Game Dev track

Game Jam 2022 - 2D Platformer Game Nov 2022

- Led development of player movement, enemy AI, and UI in Unity
- Collaborated with 8 teammates on game design and polish
- Project received top honors for innovative gameplay and teamwork

Website for the Dormitory | [GitHub](#) Dec 2022

- Created a dormitory management app using Java (Spring Boot) and HTML/CSS
- Wrote unit tests and full SRS documentation with UML diagrams
- Focused on backend logic and clean architecture

- Built an Android diet tracker app with Firebase login and data storage
- Designed responsive UI for various devices using Android Studio
- Supported meal logging, calorie tracking, and daily progress visualization

EDUCATION

Bachelor of Computer Science **GPA: 5.0**

Polish-Japanese Academy of Information Technology

Oct 2020 - Feb 2024 **Warsaw, Poland**

Master of Software engineering **GPA: 5.0**

Polish-Japanese Academy of Information Technology

March 2024 - July 2025 **Warsaw, Poland**
